

critical customer protection

100% Uptime

Water utilities service critical customers that must have safe water supplies 100% of the time. Put our vast expertise in customer protection and planning to work for you. We know how to service these unique customers while maintaining water access and quality 100% of the time.

Locating, identifying, assessing and managing water assets connected to critical customers requires hands-on experience. The opening or closing of just one valve may disrupt or eliminate the water supply. From hospital zones to schools zones, government facilities to industrial sites, Wachs Water Services has partnered with utilities nation-wide ensuring critical customer have critical water 100% of the time.

Put the most experienced asset management company to work for you
